

## Add a banner to your Blackboard Course

Find or create a banner for your course site. Save the file locally (on the hard drive, n: drive or on a diskette). To insert the banner do the following:

- In the **Control Panel**, select **Settings**
- Then, in **Settings**, select **Course Design** and then **Course Banner**.
- Use **Browse** to find the banner file; select it, click **Open** in the Dialogue box.
- When the file location appears in the Blackboard window, click on **Submit**.

Here are some resources where you can find clip art, backgrounds, text, etc. for your WebPages or Blackboard web site.

Remember: Right click, "Save Image As...", and use it!
